11. Which fast-food restaurant allows you to choose your side in a value meal?
- Wendy's**

12. How should healthy choices be determined when nutrition information is not available?
- a. Avoid fried foods and extra sauces.**
 - b. Choose a value meal.

Name _____

Hour _____

Test (Grades 7-9)

- Who should determine portion size in the fast food industry?
 - The individual
 - Fast-food restaurants
- Why did the individual who ordered the combo only get three fries?
 - The server was rude.
 - That was the right portion for him.
 - They were out of fries.
- Why did Aaron get the whole burger and fries while Ellen only got part of her order?
 - The server did not like Ellen.
 - Aaron ordered first.
 - Aaron and Ellen each received their proper portion.
- What is the industry's role in providing the proper portion for consumers?
 - Fast-food servers should estimate customer's height, weight, and activity level to determine the proper portion.
 - Fast food restaurants should provide several sizes and menu options for customers to choose the best option for themselves.
- How do you determine the proper portion for yourself?
 - Only eat at restaurants with body scanners that will determine the proper portion for you.
 - Determine your calorie needs based on your height, weight, age, gender, and activity level.
 - You do not need to know your proper portion; the fast-food industry will determine it for you.
- Rank the following individuals according to calorie needs, with 1 needing the most calories per day and 3 needing the least.
 - ___ a small child
 - ___ a very active adult male
 - ___ a petite female

7. How should you determine how many calories to eat at each meal?
 - a. Eat until you are full.
 - b. Eat a combo meal from a fast-food restaurant, as they know how many calories you need at each meal.
 - c. Determine how many calories you need each day, and divide that number by the number of meals you are going to consume that day.

8. What is an easy way to lose weight?
 - a. Eat fast food for 30 days.
 - b. Calculate how many calories you need each day, and keep in-depth records of how many calories you consume.
 - c. Eat smaller portions than you normally consume.

9. You should order a value meal at a fast-food restaurant to save money, regardless if it is too much food or not. True or False

10. The money saved by ordering a value meal instead of a healthier meal is not worth the extra calories that could cause you to gain weight. True or False

11. What can increase calories in a baked potato, salad, or sandwich?
 - a. Adding several vegetables instead of sauce.
 - b. Eating the item plain.
 - c. Adding extras such as cheese sauce, dressing, or mayonnaise.

12. What does the fast-food industry say about offering healthy options?
 - a. Fast-food restaurants offer healthy options, but customers do not purchase them.
 - b. Consumers love them and do not order burgers and fries when healthy options are available.
 - c. Salads outsell burgers and fries.

13. Customers want larger portions today than the original portions that were offered when fast-food restaurants began. True or False

14. Which is a better option?
 - a. A fried chicken sandwich, large fries, and a large drink.
 - b. A grilled chicken sandwich, small fries, and a small drink.

15. How can you decrease the amount of calories in a salad?
- a. Eat half of the salad with all of the dressing.
 - b. Leave off the veggies, and add croutons and bacon bits.
 - c. Leave the dressing on the side, and lightly dip each bite of salad in the dressing.

16. A fried taco has less fat and calories than a soft shell taco. True or False

17. Why is a taco salad from Taco Bell not a good choice?

- a. Too many vegetables
- b. Fried shell increases fat and calories.
- c. Too much lettuce

18. What has fewer calories at McDonald's?

- a. A traditional hamburger
- b. A grilled chicken sandwich
- c. A filet-of-fish sandwich

19. What can double the calories in a salad?

- a. Choosing grilled meat instead of fried.
- b. Adding all of the dressing.
- c. Adding more vegetables instead of meat.

20. Would a large shake fit into a small female's calorie needs? Yes or No

21. Which restaurant offers smaller shakes?

- a. McDonald's
- b. Wendy's

22. Which restaurant allows you to choose a salad as a side?

- a. Taco Bell
- b. Wendy's
- c. McDonald's

23. How can you have a healthy meal at Kentucky Fried Chicken?
- Ask for extra breading on your chicken, and eat several biscuits.
 - Take the breading off your chicken, and order vegetables as your sides.
24. What side is a better option at Arby's?
- Potato cakes
 - Mozzarella sticks
 - Fries
25. What sandwich has fewer calories at Arby's?
- Market Fresh Roast Ham and Swiss
 - Big Montana Roast Beef Sandwich
26. How do you make healthy choices at restaurants that do not have nutritional information?
- Choose fried instead of grilled.
 - Watch mayonnaise and sauces on sandwiches.
 - Always order fries.
27. What is not a consideration when making healthy choices?
- Limit your intake to just fast food.
 - Watch add-ins such as sauces, dressings, and cheese.
 - Choose smaller portions to lose weight.
 - You have to make the choice to order healthy options.
